## 2.3.1 Student centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences.

The teaching-learning process is a significant goal and strength of our college. Students are provided the perfect balance of traditional and modern ways to make learning student-centered and pleasant. Experiential learning, participative learning, and problem-solving approaches are well used to promote students' holistic development and facilitate lifelong learning and knowledge management.

### 1 Experiential Learning

1. Practical courses (laboratory) including Add on experiments are made compulsory in the offline mode class activities.
2. Each student has to do a Project as part of the curriculum where the student can choose a domain of their interest and implement their innovation. The students are motivated to do industry and research-oriented projects.
3. Content beyond the experiments is assigned in the form of workshops.

Hyderabad.

**Committed to Excellence in Higher Education**

## REPORT

Ada Lovelace Day (ALD) is an international celebration of the achievements of women in science, technology, engineering and maths (STEM). It aims to increase the profile of women in STEM and, in doing so, create new role models who will encourage more girls into STEM careers and support women already working in STEM.

Founded in 2009 by Suw Charman-Anderson, it is now held every year on the second Tuesday of October. It features the flagship *Ada Lovelace Day Live!* 'science cabaret' in London, UK, at which women in STEM give short talks about their work or research in an informal, theatre-like setting.

Our mission at Ada Lovelace Day is to raise the profile of women in STEM, and we think our two anthologies about the inventors, pioneers, technologists, scientists, engineers and mathematicians, both modern and historic, do exactly that! Indeed, only one thing unites these stories, whether it is the ground-breaking use of scuba diving to study sharks, or the rigorous physical and psychological testing of Mercury astronaut hopefuls — all our protagonists are women.

In this eve we organized events like **poster making and ppt presentation** to our students.

Some of the photos of poster presentation by students.

## REPORT

The outcomes of the workshop:

The participants at the end of the workshop were able to learn

- The importance of excel in the execution of organisation's various purposes
- The access Microsoft excel for automatic data analysis
- The ease managing of structure of information
- The effective keeping of track of sales leads, project status reports, and invoice reports.

The resource person explained the methods and ways of using the tools for effective analysis of data. He discussed the various formulas that can be used to work on the data analysis specially for examination and student data. He also explained the usage of excel in drawing graphs and charts.

The benefits of learning Advanced Excel includes

- Build great charts
- Use conditional formatting
- Help identify trends
- Bring data together
- Online access

The participants were to the lab to have hands-on experience, where they were exposed to the short cuts and tools that can aid the office assistants in the analysis of students and department data in many ways. The participants were motivated by the resource to take-up online exam to receive certificate of completion on Advanced Excel

## REPORT

To strengthen the mechanism to deal with cyber crimes in a comprehensive and coordinated manner.

An Awareness program is conducted on Cyber Security, it is the state or process of protecting and recovering computer systems, networks, devices, and programs from any type of cyber-attack. Cyber security measures are designed to combat threats against networked Systems and applications, whether those threats originate from inside or outside of an organization.

**Need of Cyber Security-** Our society is more technologically reliant than ever before and various aspects of our being are heavily driven by technology e.g. power, industries, law and order, safety etc. Cyber security thus gains paramount importance as it is imperative for protecting these data sources and IT infrastructure from being misused. This includes sensitive data, official data, personally identifiable information (PII), protected health information (PHI), personal information, intellectual property etc.

Always remember that, once the internet gets hold of personal or sensitive information, there has no control over it. Anything which can be put up that can be grabbed, copied and saved on someone else's computer and mirrored on other sites.

“Do your part, Be Cyber Smart”

# REPORT

Computers are used to solve various problems in day-to-day life. Problem Solving is an essential skill that helps to solve problems in programming. There are specific steps to be carried out to solve problems in computer programming, and the success depends on how correctly and precisely we define a problem. This involves designing, identifying and implementing problems using certain steps to develop a computer.

Many companies look for candidates with excellent problem-solving skills. These skills help people manage the work and make candidates put more effort into the work, which results in finding solutions for complex problems in unexpected situations. These skills also help to identify quick solutions when they arise and are identified.

People with great problem-solving skills also possess more thinking and analytical skills, which makes them much more successful and confident in their career and able to work in any kind of environment.

Solving a question that is related to computers is more complicated than finding the solutions for other questions. It requires excellent knowledge and much thinking power. Problem solving in programming skills is much needed for a person and holds a major advantage. For every question, there are specific steps to be followed to get a perfect solution. By using those steps, it is possible to find a solution quickly.
